Scott M. Bateman, COO, Security Analyst

6380 SE Drake St.

Hillsboro, Oregon 97123

Phone: 971.275.3835

Email: batemans@bluehorizonsinc.com

Scott Bateman, Chief Operations Officer and Security Analyst, has been in the technology industry since 1997. He specializes in surveillance and monitoring solutions for commercial businesses and public facilities. He is an equal partner in ownership of Blue Horizons Technical Solutions, Inc. – a single-source for professional technology solutions including hardware, software development, web hosting, digital surveillance and critical equipment monitoring. Scott's primary duties at Blue Horizons are managing day-to-day operations, surveillance/monitoring consulting, sales, and system installations.

Scott Bateman has working relationships with technical and craftsman/trade companies throughout the Portland metropolitan area, and across the nation. These relationships provide an expansive pool of resources and a knowledge-base of physical construction, which is essential in the design and layout of a custom surveillance and monitoring solution. "If ever the situation exists that a potential or existing client is in need of services other than those provided by Blue Horizons, it's my pleasure to refer my clients to a trusted list of tradesmen – electricians, low-voltage technicians, mechanical engineers, or even plumbers for example.", says Scott. "I aim to be a resource for my clients in all ways possible by serving as a professional security and technology resource that they can call on any time to cover a broad list of technical needs or service referrals." Scott's experience in the surveillance and monitoring industry as a customer in the realm of national and global corporations has given him a unique perspective from which to offer cutting-edge security products at an affordable price. "I quickly grew weary of over-priced, under-featured security solutions. I knew there had to be a better and more affordable way."

Scott is a 6th generation native Oregonian, who has developed his professional career in his home state. He has completed post-graduate studies focused on physical construction, surveillance, critical systems monitoring, and business management practices. Scott continues to maintain a rigorous schedule of continuing education to keep up with technical advances in the surveillance and monitoring industry, and to maintain his professional credentials. Scott follows the philosophy that the success of the company is insured by making the client's needs his number one priority. "I want our clients to be confident that we're always there for them and ready to serve their needs in the most efficient and effective possible way. Our products sell themselves on their own merit and capabilities; it's the long-term relationship with the client that is most important to me."

Scott, his wife Patricia, and their two children live in Sherwood, Oregon. Scott plays an active role with his father in maintaining the family homestead settled by his family six generations ago in Gale's Creek, Oregon. The Bateman family actively contributes to the St. Francis Parish School, where the children attend, and also volunteer their time to the school throughout the year. Scott enjoys motorcycling in his free time, while Patricia is an accomplished photographer and craftswoman. Scott is committed to serving the needs of his family and his clients, while maintaining an active role in the community.
